Dilated Pre-op Exam: The Eye Institute Laser Vision Center provides a free screening to determine if you are a good candidate for refractive surgery. A dilated pre-op exam is also required prior to surgery and can be done at the time of your screening or once a surgery date is scheduled.

Payment Options

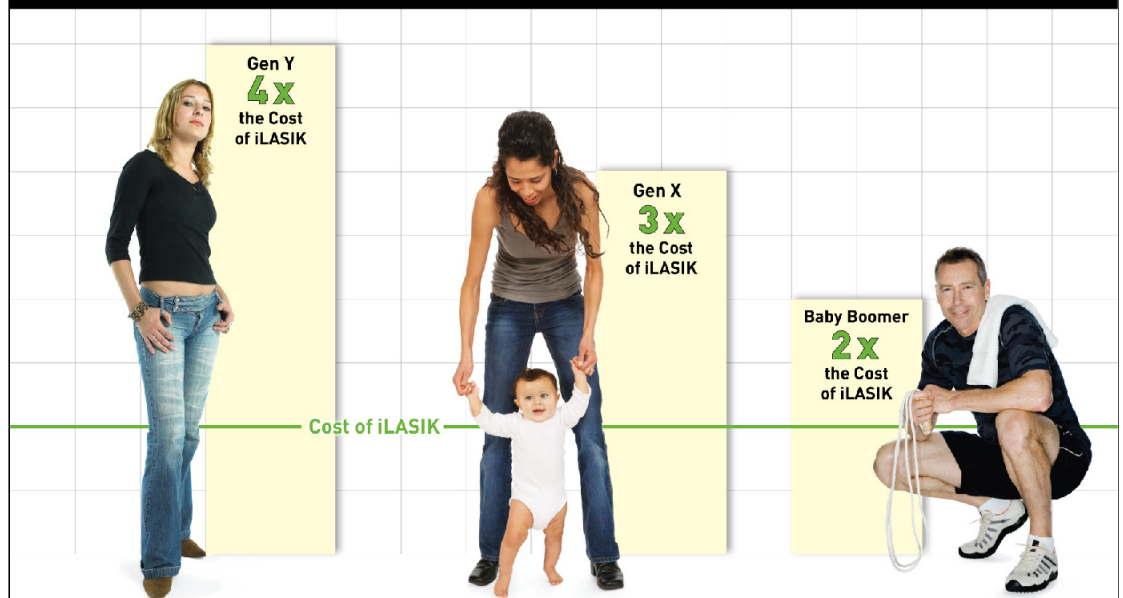

- 1) Payment in Full:** Full payment is required the day of surgery. We accept cash, credit card (Visa, MasterCard, and Discover), or cashier's check payable to Black Hills Regional Eye Institute.
- 2) Care Credit Financing:** Care Credit offers a full range of payment including no interest and extended payment plans. You must be approved prior to surgery. Apply online at www.lasikrapidcity.com.
- 3) It is the patient's responsibility to determine insurance eligibility for LASIK or PRK. Any potential coverage will not be honored if discussed after surgery.**

All Prices Include:

- 1) All-laser custom LASIK or PRK (the same technology approved for military and NASA pilots).
- 2) One year of post-op care.
- 3) Surgery kit with artificial tears samples, goggles for sleeping, sunglasses, and relaxing medication for surgery day.
- 4) Standard or Lifetime enhancement plan.
- 5) **Freedom from glasses and contacts!**

Are Contact Lenses Really Less Expensive than iLASIK?

With continuous wear contacts costing as much as a dollar a day, is LASIK surgery really more expensive? It may surprise you that LASIK vision correction surgery could actually prove to be less expensive than long-term dependence on eyewear. The iLASIK Procedure is the result of over a decade's worth of technical refinement. It combines the latest all-laser technology in one precise and efficient LASIK procedure safe enough to be approved for use by NASA and the U.S. military. Costs are estimates and provided for comparison purposes only. Your personal cost will vary. Costs are based on 20 years or more of wearing contacts and include the fees for eye exams, contact lens replacements, and contact lens care supplies. Based on an estimated iLASIK fee of \$5,000.
